

Exit Strategies: A Plan And A Place For Your Estate Information™ By Jeanne K. Smith of Exit Stage Right®

Would your family know what to do in times of crises such as a disaster, incapacity or a death? Do they have any idea where you keep your important papers, your choices for burial or cremation, who your advisors are and what provisions you have made for them?

There is a direct correlation between how well a family is prepared for a crisis and how well they survive and recover.

An estate is like a jigsaw puzzle.

Put the pieces of information together and you create a strategic action plan for your family to follow. The software program allows you to adapt the model to fit your individual family needs, as you enter your information into the appropriate fields.

The categories covered include: Personal Information, Legal Issues, Household, Health, Insurance, Vehicles, Finances, Final Arrangements and Spiritual Issues.

The Family Resource Guide is a primer in life management, to introduce the user to the complexities of aging and equip them to assist multiple generations with their estate organization issues.

This program was created and designed by the professional organizer who pioneered the field of Estate Organization.

Order Form
